📍 Kelaniya, Gampaha.

SUMMARY

Enthusiastic and detail-oriented Software Engineer with a solid understanding of software development principles and the full development lifecycle. A fast learner with a strong ability to grasp new concepts, tools, and technologies quickly. Proven team player with excellent communication and collaboration skills, committed to contributing to team success. Adaptable and proactive in dynamic environments, with a focus on delivering efficient, user-centered, and maintainable software solutions.

EDUCATION

B.Sc. (Hons.) in Software Engineering

University of Kelaniya

📅 2023 - present

- Current GPA: 3.28

Physical Science

J/Vaddu Hindu College

📅 2019 – 2021

- Combined Maths: A | Physics: A | Chemistry: B

TECHNICAL SKILLS

Front-end Development

JavaScript, React JS, Bootstrap, HTML, CSS

Back-end Development

Java, Spring Boot, C

Database Management and Development

MySQL

Version Control

Git/GitHub

Other Concepts

Object-Oriented Programming (OOP), Data Structures and Algorithms, Solid Principles

SOFTSKILLS

Problem-Solving Skills, Team Collaboration, Adaptability, Time management, Continuous Learning, Communication, Self-Motivation, Responsibility

PROJECTS

Blood Donation Management System (Group Project)

Aug 2024 – Dec 2024 | University of Kelaniya

Developed a responsive web application to connect blood donors and recipients efficiently. The system includes donor registration, location and blood-type-based search, real-time request tracking, and an admin panel for managing records. Designed for both desktop and mobile use.

- Tech Stack: HTML, CSS, JavaScript, PHP, MySQL
- GitHub: https://github.com/Thushakaran/blood_donation_project

Fuel Quota Management System (Group Project)

University of Kelaniya

 Dec 2024 – Feb 2025

Built a full-stack system to manage fair fuel distribution using QR code based tracking. It includes vehicle registration with DMT validation, QR code fuel quotas, real-time dashboards for admins and station owners, and a mobile app for scanning and updating fuel usage. Notifications are sent via SMS and email after each transaction.

- Tech Stack: Spring Boot, MySQL, JWT, React, Vite, Bootstrap, React Native, XAMPP
- GitHub: <https://github.com/Thushakaran/Fuel-Quota-Management-System>

My-ToDo-App

University of Kelaniya

 Apr 2025

Built a mobile To-Do List app using React Native CLI with TypeScript. It supports adding, completing, and deleting tasks with Zustand for state management and AsyncStorage for persistence. Styled with Material Design for Android.

- Tech Stack: React Native CLI, TypeScript, Zustand, AsyncStorage
- GitHub: <https://github.com/keerthigopalm/My-ToDo-App>

My Portfolio

University of Kelaniya

 Apr 2025

I created a dynamic portfolio website using React, showcasing my skills and projects with a modern, responsive design.

- Tech Stack: React, CSS, JS, HTML
- Link: [My-Portfolio-Keerthi Gopalavannan](#)

HabitTrackerApp

University of Kelaniya

 May 2025

Developed a mobile app to help users build and maintain good habits. Features include local user registration/login, habit creation with daily/weekly tracking, progress visualization, and persistent storage using AsyncStorage. Implemented a clean architecture with modular components and navigation using React Navigation.

- Tech Stack: React Native CLI, TypeScript, AsyncStorage

VOLUNTEERING EXPERIENCE

Member of the IEEE(University of Kelaniya), Member of Tamil Student Association (University of Kelaniya)

LANGUAGES

English: Proficient, Tamil: Native
